

## **USE OF VIDEOS/DVDs AS PART OF THE INSTRUCTIONAL PROGRAM**

Use of videos and/or DVDs as part of the instructional program of the classroom or school is authorized as long as it is on the district's approved list. The approved films for use by classroom teachers include those found in the ESD 112 Media collection. Outside of the district approved materials list, the principal may authorize the use of other videos/DVDs if it provides appropriate educational value and is deemed essential to the instruction process. The superintendent is directed to develop procedures for specific video use within the school and/or classroom.
