

La Center Home School Academy

Annual Report - 2017- 2018

La Center Home School Academy had a student average of 22.7 FTEs with staff at 1.6 FTEs. We had our 1st full-time LCHSA student graduate this year. Fourteen students have stated that they are committed to returning next year and 8 new students have turned in their enrollment forms for the fall.

LCHSA K-8 students went on three field trips this year and would like to see more in the year to come. We worked on a few science labs during the year to make it more hands on and real life as opposed to watching a video as someone else does the experiment. We had a winter celebration for all the students who had made satisfactory progress.

Odysseyware Online is still the main online program being used for the elementary and middle school students. APEX is the main online program being used for the high school, while also piloting Odysseyware Online for HS second semester to potentially use it as a second option for our high school students.

Respectfully Submitted,
Ruth M Schrock
