## MAD SCIENCE...Science of Machines:

*Mad Science, Instructors*

### For Grades: K-6 grades:

Probe the radical world of machines & their evolution from simple machines to the complex world of robotics. Develop a foundation of understanding for the different sciences that support our mechanical friends including circuit electricity, physics & automation. Be a machine maniac!

## SCIENCE OF MACHINES

### CURRENT EVENTS\*

Find out how electricity gets from one place to another through the wild world of circuits. Challenge yourself to a series of circuit games in this electrifying exploration of Current Events!

### MOVING MOTION\*

An object in motion remains in motion while a Mad Science classroom in motion leads to fun! Explore Sir Isaac Newton's three laws of motion & how they apply to the world around us.

### RADICAL ROBOTICS\*

Welcome to Robotville! Your mission, should you choose to accept it, is to learn about & experiment with sophisticated robots & articulated automatons. Linus the Line Tracker & Be-Bot Robots will be your guides!

### GET CONNECTED\*

Using smoke signals is just not practical in today's world. It is definitely easier to just use your cell phone! It's all about communication as we explore the science of telecommunications.

## WEDNESDAYS ONLY!

**#8682-14A      Oct. 3-31, 2018 (no class 10/17)      from 3:00-4:00PM**  
**Held at the Elementary in Mr. Lepak's room #406 (round building)**

**Fee: \$67** (minimum of 12 students/maximum of 20)
