MAD SCIENCE...MACHINES & MOLECULES:

Mad Science, Instructors

For Grades: K-6 grades:

Join us as we continue our exploration of the mighty molecule. Experiment with the properties of acids & bases & probe the atoms that create static electricity. Begin your journey to be a machine maniac & discover how simple machines can indeed make work easier. Machines & Molecule Classes: Mad Machines, Pulley & gears, pH Phactor, Watts up.

MACHINES & MOLECULES

MAD MACHINES*

The most complex machines of today all had very simple beginnings. Though they don't require electricity or batteries, simple machines like screw, pulley, axel, & wedge can accomplish mighty tasks. Find out how these simple machines make work easier!

PULLEYS & GEARS*

It's a bird, it's a plane, NO, it a pulley! Lifting tall buildings with a single pull or creating force with the turn of a pedal, pulleys & gears help us out & make our work easier.

pH PHACTOR*

What is an acid? What is a base? How do you tell the difference? Discover the power of hydrogen in this explosive class that will have you climbing up & down the pH scale with ease!

WATTS UP*

A Mad Science Laboratory is never complete without hair-raising electrical experiments! Learn about lightning & create electro-static lightning bolts in the safety of the class room.

WEDNESDAYS ONLY!

#8683-16 April-17-May 8, 2019 from 3:00-4:00PM
Held at the Elementary in Mr. Lepak's room #406 (round building)

Fee: \$69 (minimum of 12 students/maximum of 20)
