MASON (Orchard) BEES

Instructor: Vione Graham

Ages 18 & older

These incredible pollinators help our fruit & berries produce abundant crops. One mason bee can pollinate what it would take 60 honey bees to pollinate. They do not make honey or sting, their sole purpose is to pollinate. Your yearly produce will be consistent & bountiful. Their life cycle is so fascinating, you will appreciate & find they are one of our best friends. They take very little care. Come & learn all about these little mega-pollinators. I will have nests & houses available for purchase.

Held at the High School Library.

#8683-21 WED. Feb. 27, 2019 from 7:00-8:30PM

FEE: \$10 (*1 free bee cocoon included*).
